Jonathan Jesús Bracho Cogollo
Full Stack Developer

I am a Full Stack Developer with a wide range of skills and knowledge that allow me to develop and maintain web applications. I am comfortable working with both front-end and back-end technologies, and have a strong understanding of how the two work together. My background in teaching means that I am able to effectively communicate with people from all walks of life, I believe that this makes me a better developer, as I am always looking to improve my skills.

SKILLS

- **Teach Skills:**

Programming Languages: Javascript, TypeScript. | **Web technologies:** HTML5, CSS3. | **Frameworks/Libraries:** React, Redux, Nodejs, Express, Nextjs, Chakra UI, Material UI. | **Databases/ORM:** PostgreSQL, Sequelize. |**Version control:** Git & Github. | **Project management:** Jira, Slack, Trello. | **Methodology:** Scrum.

- **Soft Skills:**

Effective and assertive communication: Interviewing potential candidates for tutoring, interacting constantly with parents, representatives or guardians, attending and providing solutions to their requests and/or resolving conflicts.

Teamwork: Significant collaboration during the development of projects applying Scrum methodology. Increase the number of students collaborating closely with the Marketing team.

Leadership: As a Full Stack Teaching Assistant, lead groups during their learning process and enhancing the development of technical skills and soft skills. Organize, supervise and evaluate the annual and quarterly plans developed with the management team and advise the members of the organization for their correct execution towards the achievement of the common objectives.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer |Remote - Henry Bootcamp, Buenos Aires, Argentina. September 2022.
World Travelers: https://worldtravelers-app.herokuapp.com/

I was part of the team of developers in charge of the design and development of a SPA using Next.js and Typescript. The databases used were Postgres and MongoDB with Prisma and Mongoose as ORMs. The backend was developed

using Socket.io, Nodemailer, Auth0 and Cloudinary. The frontend with ChakraUI, React, ReactQuery, Leaflet, Rainbowkit, Wagmi, Ethers.js. Version controls were Git & Github and the methodology used was SCRUM.
 I was responsible for the design and development of the frontend of the application in team with another developer.
 The deployment was configured with railway for the database and heroku for backend and frontend.

- As a user you can filter, sort, search, create trips, join other trips, pay through paypal or web3 and comment on tourist activities and chat with other users. As admin user, you can create tourist activities in destination cities previously added.
- Design and development of a SPA using nextjs, typescript, Socket.io, prisma, MongoDb, Postgres, ChakraUI.

Full Stack Teaching Assistant |Remote - Henry, Buenos Aires, Argentina. September - October 2022.

- Coordinate a group of students to achieve integration into the study group.
- Guide students in the first steps of the course.
- Assist in the resolution of exercises and promote group collaboration (Pair Programming).
- Propose ideas for the improvement of the Bootcamp processes.

Full Stack Web Developer |Remote - Henry Bootcamp, Buenos Aires, Argentina. August 2022.
Pokemon App: https://pokemon-app-by-jonathanbracho.vercel.app/

- I developed a Pokemon App that allowed users to search, filter, and sort Pokemons, as well as create and update them. The frontend was built with React, Redux, and pure CSS, while the backend was built with Node.js and Express. The database was set up by PostgreSQL and Sequelize.
